- If the meter inspection is **rejected** for repairs, then a properly licensed electrical contractor will need to obtain a separate electrical permit before commencing the work and call for an inspection after repairs have been completed. This office will require a copy of his/her TN contractor’s license if work needs to be done.
- If the meter inspection is **approved**, the electrical inspector will leave a sticker on the meter. It is the responsibility of the applicant to contact the Electric Power Board to request that the power to be turned on (423-648-1372).
- Please keep in mind that the inspector may need up to a 24 hour notice for an inspection. We will try to accommodate you as best we can.

It is understood that any needed repairs are to be done by an electrical contractor licensed by the State of TN. We will need a copy of his/her State license.

The undersigned does hereby declare that the statements contained in this document, are true and correct to the best of his or her knowledge, information and belief.
